

Application Checklist for Projects To Be Approved Under CD-0004-15

Project Name:

Project Location (city, county):

Expected Project Start Date:

Expected Project End Date:

Applicant Name:

Project Partners:

Landowner Name:

Stream:

Watershed (per Calwater HUC 10):

Project Description – Attach Documents That Address The Following:

Describe the goals and objectives of the project including project type(s) seeking coverage (refer to CD).

Provide a map of the project site (including lat./long. and boundary or length of the project)

Attached: Yes No

Please list all NMFS and USFWS Trust Resources present:

Pre-project photos (post-project photos are **required** when project is implemented).

Attached: Yes No

Project designs.

Attached: Yes No

Please provide a summary of all **applicable** Federal, State and local permits (including CEQA or a categorical exemption). *Please send copies (electronic) of final permits when received. If permits are not in hand yet, please provide the application for the permit and expected date for it to be received.*

Federal:	Yes	No	N/A	Notes
Army Corps 404				
NMFS consultation				
USFWS consultation				
Other(s)				
State:	Yes	No	N/A	Notes
CDFW LSA (1600) and CESA (if applicable)				
RWQCB 401				
CEQA				
Other(s)				
Local/County:	Yes	No	N/A	Notes

Please describe how your project is consistent with each element of the Coastal Act below:

A. Environmentally Sensitive Habitats. The Coastal Act provides the following policy regarding environmentally sensitive habitat (ESHA):

Section 30240

(a) Environmentally sensitive habitat areas shall be protected against any significant disruption of habitat values, and only uses dependent on those resources shall be allowed within those areas.

(b) Development in areas adjacent to environmentally sensitive habitat areas and parks and recreation areas shall be sited and designed to prevent impacts which would significantly degrade those areas, and shall be compatible with the continuance of those habitat and recreation areas. Please explain below:

B. Marine Resources/Water Quality. The Coastal Act provides the following policies regarding marine resources:

Section 30230

Marine resources shall be maintained, enhanced, and where feasible, restored. Special protection shall be given to areas and species of special biological or economic significance. Uses of the marine environment shall be carried out in a manner that will sustain the biological productivity of coastal waters and that will maintain healthy populations of all species of marine organisms adequate for long-term commercial, recreational, scientific, and educational purposes. Please explain below:

Section 30231

The biological productivity and the quality of coastal waters, streams, wetlands, estuaries, and lakes appropriate to maintain optimum populations of marine organisms and for the protection of human health shall be maintained and, where feasible, restored through, among other means, minimizing adverse effects of waste water discharges and entrainment, controlling runoff, preventing depletion of ground water supplies and substantial interference with surface water flow, encouraging waste water reclamation, maintaining natural vegetation buffer areas that protect riparian habitats, and minimizing alteration of natural streams. Please explain below:

Section 30232

Protection against the spillage of crude oil, gas, petroleum products, or hazardous substances shall be provided in relation to any development or transportation of such materials. Effective containment and cleanup facilities and procedures shall be provided for accidental spills that do occur. Please explain below:

Section 30233

*(a) The diking, filling, or dredging of open coastal waters, wetlands, estuaries, and lakes shall be permitted in accordance with other applicable provisions of this division, where there is no feasible less environmentally damaging alternative, and where feasible mitigation measures have been provided to minimize adverse environmental effects, and shall be limited to the following:
... (7) Restoration purposes. Please explain below:*

Section 30236

Channelizations, dams, or other substantial alterations of rivers and streams shall incorporate the best mitigation measures feasible, and be limited to (1) necessary water supply projects, (2) flood control projects where no other method for protecting existing structures in the floodplain is feasible and where such protection is necessary for public safety or to protect

existing development, or (3) developments where the primary function is the improvement of fish and wildlife habitat. Please explain below:

C. Agriculture. The Coastal Act provides the following policies regarding protection of agricultural resources:

Section 30241

The maximum amount of prime agricultural land shall be maintained in agricultural production to assure the protection of the areas agricultural economy ... Please explain below:

Section 30242

All other lands suitable for agricultural use shall not be converted to nonagricultural uses unless (1) continued or renewed agricultural use is not feasible; or, (2) such conversion would preserve prime agricultural land or concentrate development consistent with Section 30250. Any such conversion shall be compatible with continued agricultural use on surrounding lands. Please explain below:

Section 30243

The long-term productivity of soils and timberlands shall be protected, and conversions of coastal commercial timberlands in units of commercial size to other uses or their division into units of noncommercial size shall be limited to providing for necessary timber processing and related facilities. Please explain below:

D. Archaeology. The Coastal Act provides the following:

Section 30244

Where development would adversely impact archaeological or paleontological resources as identified by the State Historic Preservation Officer, reasonable mitigation measures shall be required. Please explain below:

E. Scenic/Visual Resources. The Coastal Act provides the following:

Section 30251

The scenic and visual qualities of coastal areas shall be considered and protected as a resource of public importance. Permitted development shall be sited and designed to protect views to and along the ocean and scenic coastal areas, to minimize the alteration of natural land forms, to be visually compatible with the character of surrounding areas, and, where feasible, to restore and enhance visual quality in visually degraded areas. New development in highly scenic areas such as those designated in the California Coastline Preservation and Recreation Plan prepared by the Department of Parks and Recreation and by local government shall be subordinate to the character of its setting. Please explain below:

F. Public Access. The Coastal Act provides the following:

Section 30210 (Access; recreational opportunities; posting)

In carrying out the requirement of Section 4 of Article X of the California Constitution, maximum access, which shall be conspicuously posted, and recreational opportunities shall be provided for all the people consistent with public safety needs and the need to protect public rights, rights of private property owners, and natural resource areas from overuse.

Section 30211 (Development not to interfere with access)

Development shall not interfere with the public's right of access to the sea where acquired through use or legislative authorization, including, but not limited to, the use of dry sand and rocky coastal beaches to the first line of terrestrial vegetation. Please explain below:
