

STATEWIDE RESTORATION PROGRAMMATIC BIOLOGICAL OPINION POST-CONSTRUCTION REPORT FORM

Last Updated: 02/07/2025

INSTRUCTIONS

- Report all injury or mortality of listed species to USFWS ES within 48 hours.
- Submit the Post-Construction Report Form to USFWS ES (and copy the Action Agency) by December 1st each year. If there are ongoing revegetation or species monitoring beyond the report due date, provide a report annually on December 1st until success criteria have been met, or monitoring has ceased¹.
- Any incidental take that occurred during project construction must also be reported on page 2 of this form.

Project Proponent Lead	n		
Action Agency Project			
Name			
USACE Action ID Number			
Report Start Date	Stream	Latitude (decimal degrees)	
Report End Date	Watershed	Longitude (decimal degrees)	
Project Details List of affected Covered S Review Form.	pecies and/or Critical Habitat. List must correspond to	the Covered Species listed on the USFWS-approved ESA Section 7(a)(2)	
Disturbance/ Restoration	Total linear feet of stream disturbed Total linear feet of stream dewatered Total acres restored		
	Total linear feet of upstream habitat made accessible		
	Total linear feet of stream bank stabilized or planted with riparian species		
Covered Species Relocation	Name/contact information for the USFWS-Approved Biologist(s) involved in the relocation.		
	Where were the Covered Species relocated?		
	 Number of captures, releases, injuries, an 	d mortalities.	
	Please attach monitoring data for all reloc	cation events. <u>Attach as a separate file</u> .

Project Details

Revegetation	Was revegetation proposed as part of the approved project?		
	Revegetation duration from to		
	 Was revegetation implemented as proposed?		
	Monitoring	• If a monitoring plan was submitted and approved during the ESA Section 7(a)(2) Review Form process, please summarize the results here or attach. Please attach photo documentation of preand post-project conditions. Attach as a separate file. Photos should be taken from the four cardinal directions and from established photo points for comparison to pre-project photo documentation.	

¹VHDR-5, Revegetation Monitoring and Reporting:

All revegetated areas will be maintained and monitored for a minimum of 2 years after replanting is complete, or until success criteria are met, to ensure that the revegetation effort is successful. The standard for success is 60% cover compared to pre-project conditions at the project site or at least 60% cover compared to an intact, local reference site. If an appropriate reference site or pre-project conditions cannot be identified, success criteria will be developed for review and approval on a project-by-project basis, based on the specific habitat impacted and known recovery times for that habitat and geography.
